

YESS AWARD 2021

Young Energy Storage Scientist Award

THE AWARD - The opportunity to carry out your own research project

The Young Energy Storage Scientist award has been established by RS2E to support young outstanding scientists in the field of electrochemical energy storage.

A winner will be chosen by world-class scientists from the field after the review of an innovative project of a few pages.

The laureate will be rewarded a scholarship equivalent to one full year salary, **up to € 45,218 gross**, and a lump sum for operating costs. The confidentiality of your submission is guaranteed by the terms and conditions.

Go to www.energie-rs2e.com to download the application form and the terms & conditions

ELIGIBILITY CRITERIA

- submit a dated and signed project before August 31st, 2021,
- projects must address one of the scientific fields mentioned below,
- be, at most, 35 years-old on December 31st, 2021,
- On January 1st 2021, candidates must have obtained their PhD's degree for less than 5 years,
- read and accept the terms and conditions,
- No restriction on nationality.

FOR WHAT KIND OF PROJECT?

Participants have to submit an innovative project through an application form of a few pages. The project must address:

- any field related to electrochemical energy storage, or
- associated characterization techniques, or
- devices coupling an electrochemical energy conversion and storage function.

The application form can be filled out in French or English.

ABOUT RS2E AND BATTERIES 2021

RS2E is the French initiative on batteries and supercapacitors with a strong emphasis on technology transfer. RS2E is headed by Jean-Marie Tarascon and Patrice Simon. We bring together 17 of the best French labs in the field, 12 industrial partners and 3 public research organizations. www.energie-rs2e.com

BATTERIES 2021 is a leading professional event on batteries, held this year in Lyon, France. The award ceremony will take place during the next edition of the congress (from 29th September to 1st October 2021).
